

# The School Management App

The app that manage the data of each school under kpm for a better management.

## INTRODUCTION OF THE APP

# Objective of the app

The app is designed to be used by every school to manage and store their data in our database through the application and can be viewed by the KPM for further arrangement.

**All data saved in just few tap**

## HOW WE WORK FOR YOU

# Why Our App Useful To School

Data can be managed and stored in just few step as a record for the school and the KPM.

- ✓ Quick login with authentication
- ✓ Have a good features
- ✓ Easy to use

## FEATURES

# About Our New Features

Our app features are more into performance as the app is not designed to be used by public.

**01.**

### Fully Functional

The app is fully functional to add student data and teacher data into the database.

**02.**

### Theme changer

Our app have a theme changer that are useful for user to work at any time.

**03.**

### Simple UI

The app use simple user interface with no necessary design to push the app performance.

**04.**

### Quick Access

The app are easy to navigate to access all the relevant data needed.

## Future Improvement

# Future implementation for the app

### **Teacher Access**

Each department head of the school can have access to the app usage to reduce the admin burden.

### **KPM Access**

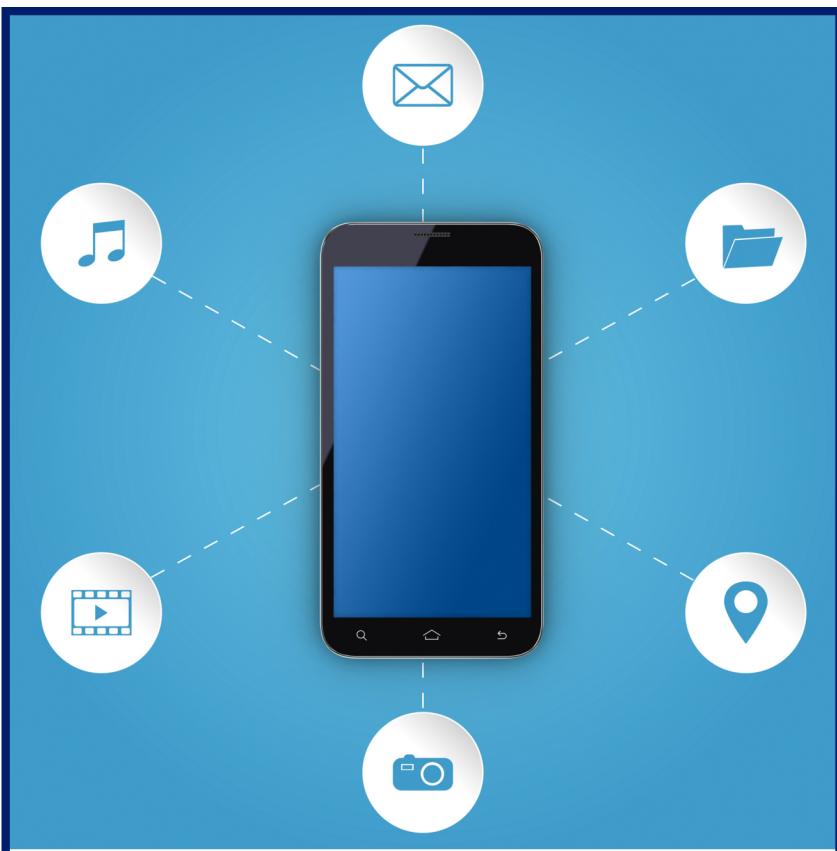

KPM can access to see the list of teacher data but cannot make adjustment for it to maintain the integrity of the data.

### **Data Segregation**

Each teacher that can have access to the app are the one to update the student result for the exam

### **Result Separation**

The results are separated by each exam and if can possibly each year during the school session.

**DEMO**

**Lets dive in to the app demo  
for a better overview on how  
the app works.**
